

- A theft?**
- Fire?**
- Hard disk failure?**
- A flood?**
- Vandalism?**
- Human error?**

We are all conscientious of the need to backup our data. However we don't have or don't take the time to carry out the tasks.

There are several companies offering backup devices, however those solutions are only partial, as one should store the backup medias outside the premises, i.e. the home, office, the warehouse or the factory.

**DatatoSecure** offers an automatic secure and simple solution, offsite and within your budget constraints.

**Why us:**

- Ease of use
- Automatic
- Secured
- Offsite
- Flexible
- Compressed and encrypted data
- Incremental back-ups
- Transparent
- Email backups
- Personalized service
- 30 day trial

**Backup:**

We supply the software which backup up to our two data centres.

Examples of data to backup up:

- Documents & Plans
- Music, Photos & Videos
- Emails (Outlook; Outlook Express; Thunderbird; etc.)
- Databases
- Whole disks or partitions.
- Registry and System States.
- Etc.

**Restore:**

There are several ways to restore the data:

- Selectively by folders or specific documents.
- Disaster Recovery

Furthermore, you can restore your data from just about any computer connected to the Internet, by using your account.

Windows Servers and Linux.  
See our site for rates on specialized servers: MS-Exchange, MS-SQL, MS-SharePoint and MySQL.

For more information:

[www.datatosecure.com](http://www.datatosecure.com)

**Our infrastructure**

- Synchronous 1 Giga-bit/sec Internet link
- RAID 6 storage
- Automatic monitoring
- Two data centres in Québec
- Server clusters
- Redundancy

**One of the reason why we are different:**

Operating System	Annual rate	Storage space
Windows 7, Vista, XP	150 \$	50 GB (Gigabytes)
MAC OS X	150 \$	50 GB
Windows Server, Linux	365 \$	100 GB (Gigabytes)

**We offer additional storage space:**

Additional storage	Annual rate
50 GB	100 \$
100 GB	190 \$
250 GB	360 \$
500 GB	700 \$
